

Kaizen Enterprise is a leading recycler and trading house of ferrous, non-ferrous metals, papers, and plastic scraps. Our team of global professionals are always eager and ready to provide best services to our customers, suppliers, and business partners. We strive to deliver quality raw materials to our customers throughout the world consistently. We work with highest integrity and provide best quality, price, and delivery.

Started in 2017, first to procure ferrous metal scrap for our own foundries and then to process and trade non-ferrous and paper scrap to other consumers around the world. As a consumer we know first-hand how important quality of input material is to final products. We buy from the vendors personally vetted by us and provide the products as per specifications to meet our customer's need. With founders 20 years of experience in trading and risk management of commodities markets for wall street firms, we can provide clients hedging solutions and index-based pricing that suits their business needs.

We started Esteem Auto Pvt. Ltd. in 90's and now leading manufacturer of cylinder liners and casting parts around the world. As a consumer we know how important quality of input material is to final products. We buy from the vendors personally vetted by us and provide the products as per specifications to meet our customer needs. As our commitment to better environment, we use over 80% of recycled metals and over 65% of power from our 1MW solar farm and 2.1MW of windmill.
